## COMMERCIAL VEHICLES || STATE OF THE INDUSTRY

## NORTH AMERICA CLASSES 5-8 VEHICLES

REPORT VERSION PUBLISHED OCTOBER 2019

2019 LAWRENCE R. KLEIN BLUE CHIP AWARD WINNER

Contributor to Blue Chip Economic Indicators and WSJ Economic Forecast Panel

ACT State of the Industry: N.A. Classes 5-8 Vehicles is published monthly by Americas Commercial Transportation Research Company (ACT). 4440 Middle Road, Columbus, IN 47203. Phone: 812.379 .2085 , Fax: 812.378 .5997 , email: trucks@actresearch.net. Copyright 2023 by ACT with all rights reserved. Reproduction, copying, or publication of this report in whole or part is not permitted without prior approval. This document is for internal use only. Questions and subscription requests should be directed to K.W. Vieth, Publisher.

## SAMPLE REPORT OVERVIEW:

Thank you for your interest in ACT Research and our work. The objective of this sample report is to share an understanding of the market, economy, and insight to analysis at the time of publication. We share this report from 2017 for market context, an assessment of our historical and current data recordings, and a look into the market indicators we gather from the OEMs.

## State of the Industry: N.A. Classes 5-8 Vehicles

This monthly report breaks down the truck and bus markets, backlogs, fuel pricing, North American original equipment manufacturer Classes 5-7 Build Plans, and other relevant information related to Classes 5-8 North American commercial vehicles.

The State of the Industry: N.A. Classes 5-8 Vehicles is a monthly report providing an in-depth overview of current commercial vehicle market activity and factors influencing demand. The foundation of this report is the monthly data provided to ACT Research by the OEMs. This direct access to the manufacturers is critical to the report's success and insights into the current market. ACT receives the monthly data on the second business day of the month, releasing preliminary numbers the next day. Finalized numbers based from the OEMs is released mid-month in the complete report.

This report is complete with:

- Monthly market indicators for Class 5 and Classes 6-7 chassis and Class 8 trucks and tractors: backlog, build, inventory, new orders, cancellations, net orders, and retail sales.
- Class 5 and Classes 6-7 segmented by trucks, buses, RVs, and step vans, Class 8 segmented by tractors with and without sleepers and trucks with and without sleepers.
- Executive Summary
- Rolling six-month industry build plan
- Backlog timing analysis
- Historical data (1996 to current)
- PowerPoint graph pack
- Preliminary net orders for the previous month published

Coverage of the bus, RV is critical for full market understanding. Not all production is trucks, thus this coverage allows for a better, more clearly define scope of the market. One of the most important aspects of this report is the accompanying database. Historical data is available in Excel documents dating from 1996 to the present. With the monthly data provided by the OEMs, this report offers a rich data history that aids in model building, market intelligence for various companies.

ACT SOI: N.A. Classes 5-8 Vehicles. - Sample Report Overview

## Report Dashboard Overview:

With your subscription to the State of the Industry: N.A. Classes 5-8 Vehicles, you will gain access to our report dashboard. Below is a listing, as well as a screenshot, of this dashboard and the support material you will receive with your report.

1. PDFs of:
a. Current \& YTD Flash
b. Summary Observations of previous two reports
c. Current report
2.Tables including:
a. Classes 5-8 Seasonally Adjusted
b. Classes 5-8 Total
c. Build \& Sales Days per Month
d. Seasonal Factors
2. Graph pack complete with $115+$ graphs covering:
a.Total Class 5
b. Total Classes 6-7
c. Total Classes 5-7
d.Total Class 8
e.Backlog Analysis
f.Fuel Analysis
g. Classes 6-7 Trucks, Bus, RV Class 8 Tractor/ Straight Truck w/ Sleeper, Day Cab 4. Glossary of Terms and Definitions, FAQs

ACT SOI: N.A. Classes 5-8 Vehicles. - Sample Report Overview

## Report Distribution \& FAQs

## When is the report published?

The SOI: N.A. Classes 5-8 Vehicles is published mid-month.
How many individuals in my company may access the report?
ACT Research allows for a maximum distribution of 4 users per report. Additional access may be purchased at $\$ 60$ per person, per report.

Can the individuals with report access be changed?
Yes, we understand that change in staff may occur. Simply call or email our team and we'll help you manage this process. There is no charge for changing users.

## How do I become aware of the release of the latest publication?

A notice, via email, will be sent to those users on your distribution list upon the publication and availability of the SOI: N.A. Classes 5-8 Vehicles. Users can then access the report via dashboard login.

Is support for ACT Research analyst available should questions arise?
Yes, we highly encourage our subscribers to call or email our staff with questions or concerns. Our analysts take great pride in being accessible and are willing to answer questions as needed.

## May I utilize aspects of the report within my organization?

Yes, but we do request that all tables, graphs, charts, or analysis cite ACT Research as the source.

## May I utilize aspects of the report for external presentations? (conferences, trade organizations, etc.)

Yes. ACT's copyright policy requires that any external presentations utilizing ACT data be sourced and cited appropriately. Furthermore, we request that external sourcing be limited to charts and/or graphs. If you are uncertain if your presentation meets our copyright requirements, contact us at 812.379.2085 or trucks@actresearch.net to inquire.
> "I would recommend ACT Research to anyone that's looking for in-depth insight into What's happening in the commercial vehicle markets. The expertise and knowledge that goes into the service they provide, there's not a better solution, in my opinion, for commercial vehicle data than ACT Research." - Jeff Trent, Mahle

BUILD LOCATION: The geography of a built unit reflects the market for which it is destined, NOT the country in which the actual production takes place. Current N.A. OEM build occurs in the United States, Canada, and Mexico.

## STATE OF THE INDUSTRY: NORTH AMERICAN CLASSES 5-8 VEHICLES

Summer Freight Respite Short-Lived: After less negative freight data early in Q3, the data has softened further since the September $1^{\text {st }}$ tariff impositions, which didn't include a grace period for goods in-transit. While the delay of the October $15^{\text {th }}$ tariff increases removed a piece of impending bad news, skepticism on trade still seems like the right stance. The US industrial downturn appears to be deepening, with rail volume weakness spreading to nearly all segments and declines worsening into October. Perhaps more concerning as consumers remain the primary engine of the economic growth outlook, US retail sales stumbled a bit in September, falling $0.1 \% \mathrm{~m} / \mathrm{m}$ ex-autos, and confidence measures are off their highs. But with a healthy balance sheet and retail sales still up $\sim 4 \% \mathrm{y} / \mathrm{y}$, the worst scenarios for heavy vehicle demand remain unlikely.

After freight data became "less bad" in July and August, they have returned to "worse" recently, as the freight recession shows signs of broadening:

- ATA's TL Load Index rose $4.3 \% \mathrm{y} / \mathrm{y}$ in August, after 4.1\% growth in July.
- ACT's 15-variable Class 8 Tractor Dashboard improved to a less-dismal -5 in July and August from -8 in June, partly on pre-tariff shipping.
- ACT's For-Hire Volume Index returned to negative in August, after jumping in July.
- NA rail carloads deteriorated to $-5.8 \% \mathrm{y} / \mathrm{y}$ so far in October from -5.5\% in September and -3.4\% in August, pressured by the GM strike.
- DAT spot rate aggregate (net fuel) improved to -14\% y/y in September on easier comps; contract $-6 \% \mathrm{y} / \mathrm{y}$.
- Cass Shipments Index fell to $-3.3 \%$ y/y in September from $-3.0 \%$ in August, the ninth consecutive negative.
- Supply-side: ACT's U.S. U-11 tractor population was up $7.3 \%$ y/y in September.

CLASS 8: In concert with weak/deteriorating freight volumes and rates, forward-looking indicators continued to erode, even as mid and downstream data points remain robust. The current situation of weak orders and strong builds is unsustainable. Meanwhile, September NA CI8 retail sales reached a new record in SA terms.

- As a preface, since entering 2019 with a near-record 297k-unit backlog, truckers have not been in a hurry to order all year. Net orders fell $70 \% \mathrm{y} / \mathrm{y}$, to 12,692 units (14.8k SA), in Sept; past 6-month SAAR $=164 \mathrm{k}$.
- Moderate cancellations trend continued: 3,267 units and $2.5 \%$ of backlog (10-yr average 2.0\%).
- Build was down from the June-July peak, but remained elevated at 1,399 upd/359k SAAR. The past 6 -months build rate is 1,480 upd, with full-month build at 27,982 units, 400 units below build plans (p20). YTD production is at a $247.8 \mathrm{k} / 1,466$ upd average.
- Q4 build plans are down 14k units since June, and the Q1 plan has been lowered $4 \mathrm{~km} / \mathrm{m}$.
- The order-to-build imbalance keeps backlog falling, down $17.8 \mathrm{k} \mathrm{m} / \mathrm{m}$, to 132,977 units. YTD is down 164k. Seasonal order relief in Q4 should cushion further BL declines. Despite the lower Sept build rate, the BL/BU fell 47bps, to 4.5 months/95 days.
- The backlog analysis (p9) shows the Q4'19 build plan at $86 \%$ filled vs. 10 -year avg. at $79 \%$; Q1 is filled to $62 \%$ of plan vs. $41 \%$ average.
- Sales surged in September, as follow-through remains solid at 32,739 units ( 32.5 k SA). Threemonth sales tracking is at 355 k SAAR.
- We attribute sales strength to still-strong carrier profits and desirable new vehicle specs that are helping to offset margin compression.
- Inventories: This is the first drop after five straight alltime records. Total Class 8 inventory was down 5.0k, to 81.0 k , and IN/RS (SA) to 2.4 months, from 3.0 last month (ACT ideal IN/RS = 2.2 months).

CLASSES 5, 6-7: MD demand metrics remain in better balance, but there are signs of modest fraying on weak NO , relative BU strength and excessive IN.

- MD orders fell $24 \%$ below year-ago levels, a ninth consecutive decline, and fell $7 \%$ from August, to 18,528 units ( 18.4 k SA). The six-month order SAAR continues to experience incremental erosion, slipping to 255 k . Cancellations were low at $2.0 \%$ of backlog.
- Build rates fell to 1,175 upd, down $6 \%$ from August. Actual build fell $14 \% \mathrm{~m} / \mathrm{m}$, to 23,509 units, on a thinning backlog and two fewer build days. Build plans (pgs13-14) anticipate build averaging 1,036 upd in Q4, boosting FY to 283.3k. The Q1'20 plan was trimmed 6 upd, to 1,075upd/68.9k.
- Backlog fell 5.3 k units, to 60,200 units. A lower build rate partly offsets the decline, as BL/BU falls 6bps to a 21-month low of 2.4 months $/ 51$ days.
- Robust RS continued, with 23,365 units sold (23.4k SA). Steady RS trending just over 282k units SAAR. IN jumped to a 70.0 k cycle peak, up 500 units $\mathrm{m} / \mathrm{m}$, and IN/RS rose 10bps, to 3.0 months/63 days.

Of September's orders, 6,700 were booked into Q4. At the end of September, the Q4 build plan was $86 \%$ full versus the $79 \%$ historical average. The $38 \%$ fill rate for Q1'20 is a bit behind the $41 \%$ historical average.

## Diesel Fuel \& Crude Oil Prices

2010-2019 (Week 40)

Crude prices fell back to $\$ 53$ per barrel in week 40. Despite increased Mideast geopolitical risk, slower global demand and increased US production are pressuring prices. Diesel was up $8 \mathrm{~cm} / \mathrm{m}$, at $\$ 3.05 / \mathrm{gal}$.

Total Class 5: N.A. Net Orders
January 2010 - September 2019

Source: ACT Research Co., LLC: Copyright 2019
Demand at the light end of MD fell 17\% from August, but at 8,789 units, September Class 5 orders rose $16 \% \mathrm{y} / \mathrm{y}$ on an easy comparison. After a slow start, ytd orders are up $5.6 \% \mathrm{y} / \mathrm{y}$, at 79.3 k units.

## Total Class 5: N.A. Backlog \& BL/BU Ratio

January 2010-September 2019

Source: ACT Research Co., LLC: Copyright 2019
The softer orders led to a 1,050-unit drop in the backlog, to 18,100 units, even as build fell $\mathrm{m} / \mathrm{m}$. The Class 5 BL/BU ratio remains in dangerous territory at 1.7 months, up 5bps from August.

Total Class 5: N.A. Inventory/Retail Sales Ratio
January 2010-September 2019

Lower retail sales and rising inventories drove another large increase in the IN/RS ratio: September 2019 clocks in at 3.4 months, up from 2.9 months in August and 2.3 months one year ago.

Total Classes 6-7: N.A. Net Orders

Source: ACT Research Co., LLC: Copyright 2019
Classes 6-7 net orders remain weak: September rose $5.0 \% \mathrm{~m} / \mathrm{m}$, to 9,739 units, but was $42.5 \%$ lower than a year ago. The past four months were the weakest since the three months ending Jan'13.

October 2019 • Classes 5-8 Vehicles • Page 11
ACT(Research

Source: ACT Research Co., LLC: Copyright 2019
Classes 6-7 backlogs fell 4,200 units $\mathrm{m} / \mathrm{m}$ on weak orders, to $\mathbf{4 2 , 1 0 0}$ units, a little slower than the $6.2 \mathrm{k} / \mathrm{month}$ burn rate since May. Despite lower build, the BL/BU ratio fell $20 \mathrm{bps} \mathrm{m} / \mathrm{m}$, to 2.9 months.

Total Classes 6-7: N.A. Inventory/Retail Sales Ratio

Source: ACT Research Co., LLC: Copyright 2019
Modestly lower inventory and stable per-day sales helped to lower the IN/RS ratio for the second straight month. The ratio declined $8 \mathrm{bps} \mathrm{m} / \mathrm{m}$, from 2.85 to 2.77 months.

Total Class 8: N.A. Net Orders
January 2010-September 2019

Source: ACT Research Co., LLC: Copyright 2019
Class 8 net orders remained in the middle of the 10k-15k range of the past six months in September, rising to 12,692 units, up $14 \% \mathrm{~m} / \mathrm{m}$ but down $70 \% \mathrm{y} / \mathrm{y}$. The three-month order SAAR is 160 k .

Total Class 8: N.A. Cancellations

Source: ACT Research Co., LLC: Copyright 2019
Cancellations were stable in September, at 3,351 units. But as a fraction of backlog, cancellations moved up 30 bps , to $2.5 \%$, at the high end of the $1.5 \%-2.5 \%$ target range, on a smaller denominator.

Total Class 8: N.A. Build
January 2010 - September 2019

Source: ACT Research Co., LLC: Copyright 2019
Class 8 build inflected to a $3 \% \mathrm{y} / \mathrm{y}$ decline in September, the first drop after a 29-month stretch of growth. September build of 27,982 units translates to a 335k SAAR, below the 365k ytd SAAR.

Total Class 8 N.A.: Net Orders 12 Mo. Avg. \& Build

Source: ACT Research Co., LLC: Copyright 2019
In a key signal of lower prospective builds, the 12MMA of Class 8 net orders continued to fall. The 12MMA fell to 18 k in September and still includes the $31 \mathrm{k} /$ month rate in Q4'19.

## Total Class 8: N.A. Backlog \& BL/BU Ratio

Source: ACT Research Co., LLC: Copyright 2019
The Class 8 backlog shed 17,800 units last month and 164k units since the beginning of 2019. BL/BU dropped to 4.5 months, but this is partly seasonal. On a SA basis, BL/BU is 5.0 months.

Total Class 8: N.A. Inventory/Retail Sales Ratio
January 2010-September 2019

Source: ACT Research Co., LLC: Copyright 2019
Inventories fell 5.0 k units $\mathrm{m} / \mathrm{m}$, to 81.0 k units ( $78.8 \mathrm{k} \mathrm{SA},-5.7 \mathrm{k} \mathrm{m} / \mathrm{m}$ ), from the August record level and after adding 28k units ytd. With record sales, the IN/RS (SA) ratio fell to 2.4 months, from 3.0 in August.

## Class 8 Backlog Fill/OEM Build Plans

Source: ACT Research Co., LLC: Copyright 2019
At the end of Q3, the Q4'19 build plan had 10.1 k open slots ( $14 \%$, below the $21 \%$ historic average). At $38 \%$, the Q1'20 plan is filling slower than the $41 \%$ 10-yr average, perhaps a denominator issue.

## Total Class 8: N.A. Retail Sales

January 2010 - September 2019

Source: ACT Research Co., LLC: Copyright 2019
September Class 8 retail sales of 32,739 were the $4^{\text {th }}$ highest on record, and on a seasonally adjusted basis; 32.8k broke the 2006 record (390k SAAR). September RS rose $12 \% \mathrm{y} / \mathrm{y}$. Year-to-date, Class 8 RS are tracking at a SAAR of 352k.

## Total Class 8: N.A. Build Per Day

January 2010 - March 2020

Source: ACT Research Co., LLC: Copyright 2019
Per-day build fell 52 upd $\mathrm{m} / \mathrm{m}$, to 1,399 units, versus the past six months' average of 1,480 upd. OEM plans project 1,219 upd in Q4'19 and 1,238 in Q1'20.

## Total Class 8: N.A. Build Plan Deviation-3 Mos. From Actual

January 2010 - September 2019

Source: ACT Research Co., LLC: Copyright 2019
At 27,982 units, September build was 500 units/2\% below the plan from three months out. The trend toward overstated plans seems likely to continue.
